SECTION 4	FIRST AID MEASURES
------------------	---------------------------

Ingestion

If swallowed, do NOT induce vomiting. If vomiting occurs, keep head below hips to help keep liquid from entering the lungs. For advice, contact a Poisons Information Centre or a doctor.

Skin

If skin or hair contact occurs, remove contaminated clothing and flush skin and hair with running water. Wash affected area with soap and water.

Eye

If in eyes, flush with water for 15 minutes. If irritation persists, call for medical help.

Inhalation

Remove person to fresh air to avoid further inhalation. Apply artificial respiration if not breathing.

First Aid Facilities

Eye wash station.

Advice to Doctor

Contains 970mL/L Liquid Hydrocarbons.
Aspiration into the lungs during ingestion or vomiting can result in severe pulmonary damage.

SECTION 5	FIRE FIGHTING MEASURES
------------------	-------------------------------

Suitable Extinguishing Media

Dry chemicals, carbon dioxide, water spray and foam are recommended.

Hazards From Combustion Products

Thermal decomposition may produce oxides of carbon, sulphur and nitrogen.

Precautions For Fire Fighters

Combustible liquid. Avoid heat, flame or other sources of ignition. Vapours may be ignited by heat or flame. Containers exposed to heat from fire should be cooled with water to prevent vapour pressure build up.

Special Protective Equipment

Fire fighters should wear self contained breathing apparatus when hydrocarbons are involved in fire.

Hazchem Code

None allocated.

SECTION 6 ACCIDENTAL RELEASE MEASURES

Emergency Procedures	Isolate area and restrict entry. Eliminate all sources of ignition.
Methods and Materials for Containment and Clean Up Procedures	Use absorbent, sand or clay. Shovel into containers. Remove to outside. Prevent liquid from entering sewers and water ways. Dispose of in accordance with Federal, State and Local regulations.

SECTION 7 HANDLING AND STORAGE

Precautions for Safe Handling	Keep away from heat and sparks. Do not breathe vapours. Keep containers closed. Keep out of reach of children.
Conditions for Safe Storage	Provide adequate ventilation. Do not store opened containers. Use entire contents.

SECTION 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

Exposure Standard means the average concentration of a particular substance in the worker's breathing zone, exposure to which, according to current knowledge, should not cause adverse health effects nor cause undue discomfort to nearly all workers.

Biological Limit Values

No biological limit allocated.

Engineering Controls

Provide adequate general or local ventilation to maintain concentrations below ES / TLV / PEL limits.

Personal Protective Equipment

Respiratory Protection	None required with normal application or use of product. If vapours exceed ES / TLV / PEL values, use a NIOSH approved respirator.
