

## PRODUCT INFORMATION SHEET

### WYNN'S DIRECT INJECTION POWER 3 (LIQUID)

Product Number: 22693 24 x 325 ml

Direct Injection Power 3 (liquid) cleans the fuel system and reduces friction inside the engine. Recommended for all petrol engines INCLUDING direct injection systems.

### Properties

- Cleans the injectors.
- Restores and maintains ideal injector spray pattern.
- Keeps the inlet valves and EGR system clean and improves acceleration.
- Reduces the formation of deposits in the combustion chamber.
- Restores and maintains engine performances and provides a regular idle.
- Eliminates and prevents starting problems.
- Reduces CO and HC emissions.
- Reduces internal friction between engine parts (cylinder head), leading to a reduction in fuel consumption.
- Does not harm catalytic converters.

### Applications

- Recommended for all petrol engines with direct injection systems. For a complete cleaning of the direct injection engine, we recommend to use the DIP 3 liquid and DIP 3 aerosol together:
- DIP3 Liquid: preventative / after-treatment. Cleans the fuel system; the "wet part" of the engine.
- DIP3 Aerosol (W23079): curative treatment. Cleans the air intake manifold and the inlet valves; the "dry part" of the engine.
- For a more thorough cleaning of the engine combustion and the fuel system, Wynn's Ultrapower 3 (61515) can be used with Wynn's Enviro Purge Apparatus (04007).

## Directions

- 500 ml treats 50 litres of petrol.
- Repeat the treatment every 10.000 km.

Note: In severe cases such as frequent short drives, city traffic, traffic jams, high speeds or mountain driving, more frequent treatment is recommended.
